

OAK (Segments A-C-E-G2-I-K2-M-N)

What has the Community Advisory Group said about the Oak route option?

- Similar to Willow but avoids Segment J
- Second highest percentage (83%) of route on the existing PSE 115 kV transmission line corridor
- A mostly direct route from Segment A to Segment N
- Segment I passes through Factoria, which is a higher-density residential and commercial neighborhood
- The use of Segment I requires K2, which is somewhat residential, but mostly follows a greenbelt
