Spring 2015

Energize Eastside project moving into the environmental review stage

Energize Eastside is a Puget Sound Energy (PSE) project to build a new electric substation and transmission lines to serve homes and businesses on the Eastside.

PSE work in 2015

Following a year-long public route discussion, PSE is moving forward with additional analysis and fieldwork of the Lakeside substation site and the two transmission line routes recommended by the Community Advisory Group.

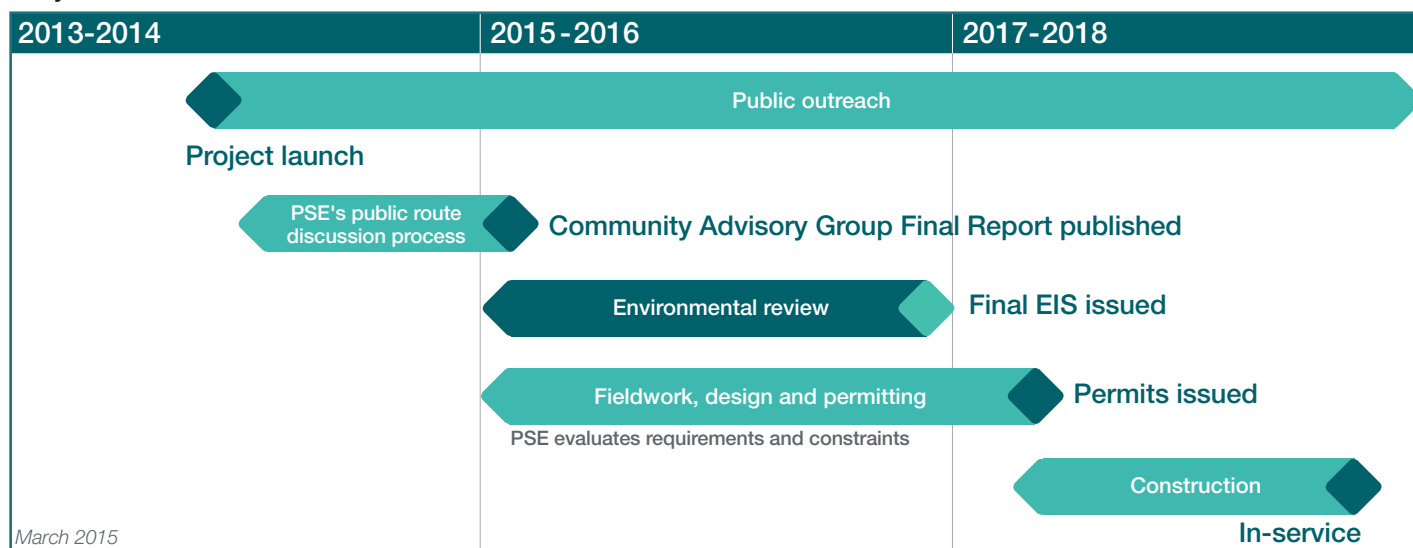

For more information on Energize Eastside, including maps of the routes recommended by the Community Advisory Group, PSE's progress to date and next steps, please visit the Energize Eastside website at pse.com/energizeeastside.

Environmental review process in 2015

The environmental review process will be led by the City of Bellevue in cooperation with Kirkland, Newcastle, Redmond and Renton, and will include preparation of a Washington State Environmental Policy Act Environmental Impact Statement (EIS). Through the EIS process, other alternative solutions may be identified and reviewed.

For more information on the EIS and opportunities for public comment, visit the City of Bellevue's website at EnergizeEastsideEIS.org.

Project schedule

Thank you for your continued interest in Energize Eastside.
